

I have recently become aware of the NAB's attempts to limit my satellite radio options. This has me very concerned. I pay a premium fee to listen to satellite radio, I was essentially forced to pay for my radio service because public radio, in my market, is so poorly programmed. Being that, atleast for now, California is still part of America, I don't currently speak and do not plan to learn Spanish, therefore my radio options are almost nill. I chose to pay a monthly fee to have quality radio programming, which I happily recieve and listen to daily and I do not appreciate anyone trying to force me to listen to their commercials. I strongly urge you to reject the NAB's petition #04-160, they should have no hand in deciding what I can or cannot PAY to listen to. They have destroyed public radio in my area and I don't want to see it done to my XM radio service as well. We have no where else to turn to for quality radio programming.
